CIR.	Column Name	
NUMBER	01,38	Total population count of reductors aged 28 dd in block group within Census bind i within the sampling frame
925837	QL 6	Total population count of individuals aged 63-66 in block group (within Census biod) within the sampling frame
INCHES	QUS	Total population count of individuals aged EL and above in block group (within Cercus book) within the sampling frame
G7668	10	Measure of size (MOS) of Cerous Inacia
700323	3.8	Measure of size (MOS) of blink group within Cerous Islanti
172263	4,4,38	Expected sample size for the age domain SB-SS in block group within Census Intel
138254	4.5.65	Expected sample size for the age domain ST-65 in block group within Census Intel
006237	4,5,65	Expected sample size for the age domain SS and above in Mock group (within Census Intal)
63172	95.0	Selection probability of block group j within Census track i in the sampling Name
131227	90,00,00	Selection probability of individual is aged 18-60 within block group (within Census track i in the sampling frame
852259	909049	Selection probability of individual is aged 63-66 within block group (within Census brack i in the sampling frame
